FROM OUR MEETING

You told us what matters. We listened.

Here is what we took away, and how the plan answers each one.

Shopify stays.
It runs your sales, cards and files and it works. We build inside it. No new systems for your team to learn.

No downtime. Ever.
A big part of your sales comes online. The store keeps selling the whole time we work.

Stickers and labels first.
Your bread and butter leads the page. Banners next, then signs and wraps.

Simple wins.
Everything on one page, a clear process, and a price in a few taps.

The calculator matters most.
We connect the price finder to the calculator you already use, so prices stay right.

Your voice.
You add the personality. We make it look and work great.

How we keep your store safe

We build on a copy
Shopify lets us work on a private copy of your theme. Customers never see it until you say go.

You review first
You click through every page on your phone and computer before anything changes.

One click live
Launch is a single switch. Your old design stays saved, so we can switch back anytime.

NEW FOR YOU

The local partner rate.

Why the lower price

You print our stickers. We would love to build your site. Refresh is $2,000, not $3,500. We also watch the site and fix bugs for 3 months after launch.

What we ask in return

A short written review once live, and your OK to share the project as a case study. Rate holds with a signed agreement and deposit by Friday, November 20, 2026.

Optional care after launch

$75 a month for 1 hour of updates, or $150 for 2 hours. Cancel anytime.

Media, when you want it

Product photos, shop video and social content. Quoted separately.

THE DEPOSIT STARTS THE BUILD

Pick, pay half, we start.

Half to book your spot, half before launch. The site goes live once the final payment clears.
